

Near Blended Wing Body portion

Near early 1990s tools – you **MUST** have a Cray picture or
One of the pictures of the labs with all of the Crays.....

Near NPSS write-up – you also must have some real NPSS pictures....there really aren't any new ones Between what John Lytle gave me and what I found Online....going to check with a P&W guy who said I could call him for a quote and see if he has any Pictures.
